Detpak

NOVEMBER 2023

Why Choose Detpak?

Detpak is a family-owned, Australian business with a worldwide network of manufacturing and sales locations. We design, manufacture and supply the food service, grocery and fast-moving consumer goods industry with world-class packaging solutions.

RESPONSIBLE BY DESIGN

With world leading innovation aligned with global sustainability principles, we ensure every product is designed to not just meet the world's best environmental, quality and safety stands but remain ahead of them for years to come.

AN INNOVATION EDGE

With our dedicated innovation studio for concept creation and rapid prototyping, and an agile team of engineering, commissioning and manufacturing leaders, there's no faster way to get new packaging in market.

SUPPLY CHAIN FLEXIBILITY

With owned manufacturing in seven countries, an agile supply chain and a dedicated sourcing team, you can rest assured that when you partner with Detpak, packaging will never be your weakest link.

TRUE PARTNERSHIP

With partnerships of over 50 years with leading global brands, we build trusted relationships that solve the commercial realities of today and can be relied on to deliver on the evolving needs of tomorrow. So don't just choose packaging, choose a packaging partner.

Elevate Your Brand

CUSTOMISE WITH DETPAK

Packaging isn't just a means to hold and transport food products, it's a way to elevate your brands' visibility and enhance your customers' experience. There is no limit to the imagination when it comes to customising your packaging items, with Detpak's comprehensive range of over 1,000 paper, board and fibre packaging solutions customisable to help elevate your brand. From Cups & Cup Accessories, to Cartons, Bags, Napkins, Trays, and Wraps; the biggest brands around the world trust us with their branded packaging solutions.

PACKAGING PARTNERSHIP PROGRAMME

ETHICAL CERTIFICATION

SUSTAINABLE MATERIALS

At Detpak, we only use paper and board from large, reputable raw material suppliers, which means no old growth forests are used. We keep the use of inks and adhesives to a minimum and prioritise the use of water-based and soy inks wherever possible. As part of our commitment to sustainable sourcing, we use ethically sourced raw materials in all our manufactured products including greater than 70% forestry certified or recycled paper and board.

FROM START TO FINISH

Detpak works with waste management and resource recovery stakeholders to develop increasingly sustainable options for product disposal, including diverting products into recycling and composting streams. As part of our membership with peak industry bodies, such as the Singapore Packaging Partnership Programme, Detpak is proactive in driving resource efficient packaging design; the recovery and recycling of used packaging; and reducing the incidence and impact of litter. The Detpak team can advise you on the best packaging options to suit your packaging end of life expectations.

RESPONSIBLE MANUFACTURING

At Detpak, our purpose is to make a positive impact for our people, our partners and our planet. That's why we work closely with industry bodies, local and federal government, to bring you the best in sustainable packaging. We maintain the most highly recognised global standards for food safety and quality consistency, including ISO 9001, ISO 14001 and BRCS. Our products are manufactured in food grade packaging environments, so our customers can be assured of the highest quality standards.

CARING FOR COMMUNITY

Detpak takes pride in being a manufacturer, not simply an importer. We work to a strict Corporate Social Responsibility Policy, which covers fair wages and working conditions. As a family-owned company, Detpak chooses to positively impact our local communities all around the world, from our headquarters in Adelaide, to supporting initiatives in the countries where we operate, and beyond. Many of our charitable initiatives focus on improving communities in a long term, sustainable way.

We've got you covered.

Countries are now taking action against single-use problematic plastics (SUPPs).

Led by Ellen MacArthur, in collaboration with the UN Environment Programme, 'The Global Commitment' has united more than 500 organisations behind a common vision of a circular economy for plastics as they work towards 2025 targets to tackle plastic pollution.

At Detpak, we provide sustainable packaging solutions to help you achieve the global targets and drive progress to help realise that common vision.

**WE MAKE RESPONSIBLE CHOICES,
TO MAKE YOUR CHOICE EASY**

Scan to discover sustainable packaging solutions and make the switch to paper

No added PFAS

What is PFAS?

PFAS (per- and poly-fluoroalkyl substances) are a group of chemicals used in a range of applications in common household items, to provide them with water, heat, sticking or grease resistance properties. PFAS are considered forever chemicals as they remain present in organisms and the environment indefinitely.

Products Containing PFAS

Over 90% of Detpak's products don't contain PFAS, with all remaining products with greaseproof properties transitioning by end of 2023. This is in alignment with global initiatives to phase out PFAS in fibre-based food contact packaging globally.

Introducing our Renewable Wraps (read more on Page 46), crafted from natural and renewable sources like sunflower seeds and canola, our wraps are not only eco-friendly but also compostable, ensuring minimal environmental impact. Most importantly, they are free from any PFAS chemicals, giving you a safer and more sustainable choice for your packaging needs. We believe in providing you with options that align with your values, and our goals, and our Renewable Wraps are a testament to our dedication to a greener, healthier future.

Bags

TAKEAWAY & CHECKOUT BAGS

Takeaway and Checkout Bags are constructed from heavyweight materials for holding multiple items. They are free-standing and easy to load.

FOOD TRAYS & CLAMS

Food Trays are sturdy and grease resistant and can be used for a variety of different foods. They are pre-formed, so food can be loaded straight in. Some food trays are polylined to provide extra grease resistance, these are not compostable or recyclable. Clams are made from clay coat board, and include vent holes, to ensure food won't get soggy.

Understanding our Packaging Terms

What is 'Sustainably Sourced'?

The paper or board materials used in our products are responsibly sourced, and the supplier has been audited for evidence of sustainable and ethical practices. Our range of I am eco™ Sugarcane Products is made from either renewable resources or post-consumer recycled content.

What is 'Recyclable'?

A product or material is recyclable if it can be collected and re-manufactured into a new product. If a Detpak product is listed as recyclable, it means this product can be readily recycled via kerbside recycling streams once food residue has been removed.

What is 'Compostable'?

Our compostable packaging is made from organic materials that break down naturally in optimal conditions, leaving no toxic residue. Microorganisms, humidity, and heat is required to break packaging down effectively and when combined with green waste and food scraps, can create a nutrient dense compost to improve our soils.

Detpak's range of paper and unlined board products are readily compostable and for all other items, various global certification standards exist, enabling consumers to understand how to responsibly dispose of their packaging. Certain packaging requires commercial composting facilities with the right amount of heat and moisture to break down, and other items may be compostable in a home compost environment. We recommend you check with your local council re acceptance of food soiled compostable packaging through green waste collection.

- 
Commercial Compostability
 AS 4736 – Australian Standard Certification
 EN 13432 – European Certification
- 
Home Compostability
 AS 5810 – Australian Standard Certification

Our Materials

Paper and wood

Our paper and board is sourced only from responsible forestry, meaning no old growth forests are used. We use quality papers and board when making all our products for premium quality assurance.

PLA (Polylactic Acid)

Polylactic acid is a bioplastic derived from plants such as corn, tapioca and potato. It is a rapidly renewable resource and can be certified as industrially compostable. Our PLA options include CPLA (crystalised polylactic acid) or PLA-lined packaging.

Sugarcane (Bagasse)

Sugarcane bagasse, a byproduct from sugarcane production, is an example of fibre-based packaging and is a rapidly renewable resource. Our sugarcane can be certified as either home or industrially compostable.

Plastic

Our traditional plastic options include cups, lids and bowls and are made from PET, polystyrene or polypropylene. These items are marked with a Plastics Identification Code (PICs) between 1 and 7, which denotes the type of plastic used to make the product.

How we measure our products

Measurements throughout The Book are displayed in millimeters.

- 
Bags & Wraps
 L x W x G
 Length x width x gusset (where applicable)
- 
Bowls
 L x W x H
 Diameter x diameter x height
- 
Cartons & Trays
 L x W x H
 Length x width x height

Sustainably Sourced	When you see this statement, it refers to the definition above, 'What is Sustainably Sourced?'
^ Compostable	When you see this statement, it means that the product with ^ symbol against it is the Compostable item within that range.
+ Recyclable	When you see this statement it means that the product with + symbol against it is the Recyclable item within that range.
